(54) SOCK

(57)Abstract:

PROBLEM TO BE SOLVED: To prepare a sock having finger sacks free from darn and of smooth cylinders, and easy in putting fingers into them and good in foot comfort, and at the same time enabling high speed production and wide cost reduction.

SOLUTION: This sock has plural finger sacks 6, 6 at the toe part 5, and the weave-openings formed near the toe part are closed. The finger sack 6 is formed with decreasing stitches 8 and increasing stitches, and each wale of both the stitches is continuously woven by bending at a corner 11.

LEGAL STATUS

[Date of request for examination] 13.04.1999

[Date of sending the examiner's decision of rejection] 20.02.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
